Reviews

It is one of the best books. Indeed, it really is a play, nevertheless an amazing and interesting literature. It is extremely difficult to leave it before concluding, once you begin to read the book.

Bloomsbury UK Okt 2015, 2015. Taschenbuch. Book Condition: Neu. 221x139x24 mm. Neuware - NASAs history is a familiar story, culminating with the agency successfully landing men on the Moon in 1969. But NASAs prehistory is a rarely told tale, one that is largely absent from the popular space-age literature but that gives the context behind the incredible lunar program. Americas space agency wasnt created in a vacuum; it was assembled from pre-existing parts, drawing together some of the best minds the non-Soviet world had to offer. With a central narrative woven from the stories of key historical figures, *Breaking the Chains of Gravity* tells the story of NASAs roots in an engaging and accessible way. The book begins with Wernher von Braun, the engineer behind the V-2 rocket, who dreamt of sending rockets into space. He orchestrated a daring escape from the ruins of Nazi Germany and was taken to America, where he began developing missiles for the United States Army. Ten years later his Redstone rocket was the only one capable of launching a payload into orbit. Just what payload von Brauns rockets would launch was under consideration at the National Advisory Committee for Aeronautics. While working out how to get a nuclear warhead through the atmosphere, NACA pioneered a round-bottomed capsule that could also keep men safe when returning from space. Meanwhile, US Air Force pilots rode to the fringes of space in balloons to see how humans handled radiation at high altitude, while NACA test pilots like Neil Armstrong flew cutting-edge aircraft in the thin upper atmosphere. *Breaking the Chains of Gravity* looks at the evolution of Americas nascent space programme, its scientific advances, its personalities and the rivalries it caused between the various arms of the United States military, right up to the launch of Sputnik...
