But if he bends forward as the French aviators are instructed to do, he will practically be upside down so that again he will concentrate stimulation upon the horizon tal semicircular canals. Physical directors have advised turning movements as practice exercises; but after all this is only of preliminary value, because experienced fliers become so accustomed to turnings and air antics that they, like acrobats, know where they are at all times and are at home in the air. Space does not permit in this article to quote from the histories of aviators at the disposal of the otologic department cases where, following impairment of the labyrinth due to mumps or syphilis, a man s flying ability has been lost or badly impaired coincidentally with the rapid deterioration of his vestibular sensory acuity. This is additional corroborative evidence of the most convincing nature. RESUME. General condition of aviator s ears, nose, and throat must be good. The ground soldier can stand still. The aviator can not. Motion assumes great added importance to the aviator. Motion-sensing, therefore, assumes great additional importance to the aviator. Of the senses concerned in motion-sensing, the vestibular sense is the only one whose utility remains constant; hence the necessity of determining the aviator s possession of requisite vestibular sense. Vestibular tests not only determine functional condition of this portion of the internal ear but give definite information concerning the integrity of parts of the medulla oblongata, pons,...
