It is the science which treats of the actions of drugs both physiologically and pathologically. What is meant by Therapeutics ? It is the science of curing disease, and may be Rational, e.g. when we understand the nature of the disease and the pharmacological action of the drug; or it may be Empirical, e.g. when we do not know why a remedy is efficient. Alkaloids. Define Alkaloids. They are active nitrogenous or organic compounds, and have an alkaline reaction, combining with acids to form salts.
