INTERSECTION AND DECOMPOSITION ALGORITHMS FOR PLANAR ARRANGEMENTS

Paperback. Book Condition: New. Not Signed; Several geometric problems can be formulated in terms of the arrangement of a collection of curves in a plane, which has made this one of the most widely studied topics in computational geometry. This book, first published in 1991, presents a study of various problems related to arrangements of lines, segments, or curves in the plane. The first problem is a proof of almost tight bounds on the length of (n,s)-Davenport-Schinzel sequences, a technique...
