Reviews

Merely no terms to spell out. We have read through and i also am confident that i will gonna read yet again again in the future. You will not sense monotony at anytime of your own time (that's what catalogs are for about should you question me).

Excel Books, 2010. Softcover. Book Condition: New. 2nd edition. The Indian industries are witnessing brand new challenges in terms of frequent new entrants from both within and outside the nation, technology upgradation at a faster rate, shorter product life cycle, increase in the customer expectations, and the like. This scenario demands our professionals to be empowered with world class managerial and technical inputs, so that they can render their best in the profession of their choice. This book explains the capacities of individuals who are effective in global roles. Further, it examines the relationship between measures of effectiveness and the individual's background, personality, learning skills, knowledge of the job, and the enactment of role behaviours. This book fulfills the need of a well-designed empirical study that tests the theories and investigates whether the skills and capacities that are critical to effectiveness in the global role differ from those skills and capacities critical to managerial effectiveness in a domestic role. This book strictly adheres to the syllabi of South Indian Universities and every minute detail has been taken into account while drafting the units/chapters. The prime objective of this work is to provide first hand information and a review of available literature on the subject to each and every deserving aspirant, who has been deprived of enhancing his professional competencies. The book provides a strong platform to professionals to meet the challenges and changes effectively in their respective sphere of study. This book would prove to be extremely useful for the Student Community and HR Managers and also for those preparing for various competitive examinations. Printed Pages: 192.
