Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from Studies in Word-Association: Experiments in the Diagnosis of Psychopathological Conditions Carried Out at the Psychiatric Clinic of the University of Zurich This book is a translation of a series of papers on the results of the association method applied to normal and abnormal persons, which appeared in the Journal fur Psychologie und Neurologie (vols. iii-xvi) and were afterwards collected into two volumes. The experiments were carried out at the instance and under the guidance of Dr. Jung. The work which Drs. Jung and Riklin published in 1904 gave an entirely new direction to association experiments. The principle of mental association is, of course, of reputable antiquity: Do you not know, then, that lovers when they see a lyre, or a garment, or anything else which their favourite is accustomed to use, are thus affected; they both recognize the lyre and receive in their minds the form of the person to whom the lyre belonged. Its experimental phase begins with Galton's work in 1879 and Wundt's in 1880. The new departure which we owe to Dr. Jung is the application of the association method to unconscious mental processes; the theory of unconscious complexes was developed by these experiments; the results obtained by Freud's psycho-analytic technique were confirmed by the use of a very different method. This confirmation by experimental methods compelled many who had hitherto looked askance at the psycho-analytic theory of the unconscious to investigate the phenomena for themselves. These studies in word-association have now acquired a permanent place in the historical development of this theory. Every serious student of psychology, every educationist, every one who wishes to engage in the study...
