

## Elements of Meteorology; PT. II. Meteorological Cycles

By John H Tice

Theclassics.Us, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1875 edition. Excerpt: . a moment, and intense electric energy was apparent. One observer said, the cloud appeared on fire at the bottom like a large pile of burning brush. Others say it was a cloud with green and red flame, and others said it was green and blue. The following were the impending planetary equinoxes: Venus May 30th; Mercury April 21st, or nine days before the tornado; Vulcan May 1st, or the day after it. The following, though containing nothing extraordinary, will be read with interest since it is the first case wherein our theory is brought to the test of the actual observations of the Signal Service. In November and the early part of December, 1870, the astronomical condition was as follows: Equinox of Mercury occurred Nov. 4th; Vulcan Nov. 10th; Venus Nov. 14th; and Vulcan again Dec. 3d. The October equinox of Vulcan, namely,...
