Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from Memorandum on Solid Lubricants This bulletin has been prepared by a Committee of the Department in connexion with the survey of the field for research on lubricants and lubrication. The Department had received various requests for information in connexion with the use of solid lubricants both alone and when mixed with oils for lubricating purposes, and it appeared to the Advisory Council that, as their Committee had been dealing with this question, a memorandum embodying existing knowledge on the subject would be of service to engineers and users of machinery at the present time. It is with this object in view that the Bulletin has been prepared, but it is necessary to point out that the present state of knowledge of the general question of lubrication is very incomplete. Little is known concerning certain theoretical matters of fundamental importance to users of lubricants. Accordingly, in issuing the pamphlet at the present time, the Advisory Council desire that it should be regarded rather as a summary of existing literature than as an authoritative statement based upon actual research work. Certain results of experiments carried out at the National Physical Laboratory, both for the Committee and for the Air Ministry, are referred to in the present memorandum. Full particulars of these experiments are not given in this Bulletin; they will appear in the Committee s final report. The Advisory Council desire to express their indebtedness to Mr. T. C. Thomsen for the preparation of this memorandum and to Mr. L. Archbutt for his collaboration in connexion with the chemical analyses of graphites.
